

## Have You Attended an SIC Basics Training Session this Fall?

The fall semester of each school year is typically the busiest SC-SIC training season, although trainings are conducted throughout the year. Many districts have already scheduled an SIC Basics training session – has yours? If not, fear not. There are still dates available in November and December to host a session near you. As we travel across the state, one thing that SIC members tell us is they would benefit from more training – yet not all school districts hosted such a training last year. Why not take this opportunity to schedule training now in your district? Whether the training is conducted by a certified SIC District Contact or is district-wide training provided by SC-SIC staff, such sessions are very important for new and more seasoned SIC members so that they can know more about their roles and responsibilities. You can reach out to your local [SIC District Contact](#) about scheduling a session for your district or call the SC-SIC office at 1-800-868-2232.
